

NEWSLETTER

November 2024

Hello Decibel Coalition (DC) Members and Supporters,

This brief newsletter will update you on where we are at on Decibel regulations.

As we told you in our Spring newsletter we were expecting Canada Gazette I (CGI) to be published this Fall. Unfortunately due to a very busy Transport Canada schedule, they have now delayed the publishing of CGI to spring of 2025.

When we heard this we engaged our Government Relations firm to reach out to see if we could move this. We did and the response we got back was as follows:

“I’ve touched base with officials and it looks like this regulatory package is targeting spring 2025 for publication in CG1. Nina confirmed that she has spoken again to Departmental officials and in her and their opinions, there is no pathway to expediting for the fall. I know that’s not the ideal outcome, but Nina was very firm that they don’t see any path to moving forward the decibel limit regulations at this time.”

As soon as we hear any further updates as to when it will be published ***you will hear from us as to where you need to go to comment on the draft regulations.***

This delay means we will likely not see regulations in force until the earliest, Spring of 2026 – But again stay tuned. If you have any questions please do not hesitate to reach out to us.

Rob Bosomworth & Nancy Croitoru
